### WRECK STATISTICS FOR 1914.

The statistical summary of vessels totally lost, broken up, condemned, &c., now published by Lloyd's Register, shows that, during 1914, the gross reduction in the effective mercantile marine of the world amounted to 766 vessels of 1,055,112 tons, excluding all vessels of less than 100 tons. Of this total, 491 vessels of 870,662 tons were steamers, and 275 of 184,450 tons were sailing vessels.

These figures, as regards sailing vessels, are practically the same as those for 1913; but as regards steamers, they are nearly 338,000 tons higher than for the previous year.

This increase is wholly accounted for by losses due to war operations. During the last 5 months of 1914 no less than 162 vessels of 372,277 tons were sunk by warships or by mines. Excluding such war losses, the tonnage of vessels lost through wreck, breaking up, etc., during 1914, is actually lower by 34,195 tons than that lost during 1913.

The number and tonnage of vessels lost, etc., during the previous five years are as follow :—

YEAR.	STEAMERS.		SAILING VESSELS.	
	No.	Tons (Gross).	No.	Tons (Net).
1909	383	645,670	483	293,562
1910	421	667,440	442	280,250
1911	427	619,752	461	265,091
1912	379	572,745	341	176,220
1913	371	533,002	294	184,028

Excluding war losses, one of the most common terminations of a vessel's career is by breaking up, dismantling, etc. (not in consequence of casualty). The amount of tonnage so dealt with in 1914 was 128,978 tons, this being 20,183 tons more than that for 1913. Sixteen per cent. of the steamers and 16·8 per cent. of the sailing vessels removed from the Merchant Fleets of the World in the course of 1914 are accounted for in this manner. Of the total tonnage of such cases 34·3 per cent. is represented by United Kingdom vessels.

The Statistical Tables exhibit interesting data as to the relative frequency of the different kinds of casualty, &c., which conclude the existence of vessels. Strandings and kindred casualties which are comprised under the term "wrecked," are, apart from war losses, much the most prolific cause of disaster. To such casualties are attributable 45·7 per cent. of the losses of steamers, and nearly 39 per cent. of sailing vessels. Cases of abandoned, foundered, and missing vessels are no doubt frequently more or less similar in the circumstances of loss. If these be taken collectively, they form nearly 20½ per cent. of the steamers, and nearly 31½ per cent. of the sailing vessels removed from the mercantile marine during 1914, owing to casualty.

The return has been prepared in such a manner as to enable a comparison to be made between the percentages of loss suffered by each of the principal merchant navies in the world. These percentages include war losses, and great as the absolute loss of vessels belonging to the United Kingdom appears to be, it is seen to form but a very moderate percentage of the mercantile marine of the country.

It may be of interest to point out that whilst the United Kingdom has lost 2·2 per cent. of the tonnage and 2·43 per cent. of the vessels owned, if all the "neutral" countries mentioned in the Tables be taken together, they have lost 2·37 per cent. of the tonnage and 2·62 per cent. of the vessels owned by them.

## STATISTICAL SUMMARY

OF

VESSELS OF 100 TONS AND UPWARDS,

TOTALLY LOST, CONDEMNED, &c.,

DURING THE YEAR

1914.

---

NOTE:—This Summary is based upon the quarterly returns of total losses, &c., which have been published by Lloyd's Register. It includes, however, vessels which had not been given up as total losses, or of the loss of which information had not been received, when the returns for the quarters in which they respectively occurred were compiled. On the other hand, a few vessels which, being definitely considered as total losses at the respective dates of compilation, were included in the quarterly returns, have since been floated, repaired, &c., and are accordingly now excluded from the statistics given herein. Particulars of all such additions to, and deductions from, the quarterly returns are given on pages 5 to 7.

A distinguishing feature of the Wreck Returns published by Lloyd's Register is that, except as stated in the footnotes to Table No. 1, they are compiled strictly according to the dates at which the casualties resulting in total loss actually *occurred*, and not according to the dates at which *reports* of casualties were *received*.

TABLE No. 1.—Showing the number, net and gross tonnage and nationality of STEAM VESSELS totally lost, condemned, &c., during the year 1914, as reported up to the 12th July, 1915; and showing also the number and tonnage of steam vessels owned in each country. (Vessels under 100 tons gross are not included in this return.)

\* Excluding vessels trading on the Great Lakes of North America.

(a) Under the heading "Missing," are included only vessels so posted or reported during the period covered by the return.

(b) Vessels condemned after damage by fire, collision, stranding, &c., are included, according to the date of the *casualties*, under "Burnt," "Collision," "Wrecked," &c.

Cases of breaking up, condemnation, &c., not known to be consequent upon stress of weather, &c., are excluded from the table; during 1914, 54 steamers of 95,728 tons gross (including 20 belonging to the United Kingdom of 43,395 tons gross) come within this category.

(c) Under the heading "Wrecked," are included vessels lost through stranding, or through striking rocks, sunken wrecks, &c.

(d) Under the heading "Lost, &c.," are included total losses which, for want of sufficient information, or for other reasons, cannot be otherwise classified.

(e) Excluding cases of breaking up, condemnation, &c., which are not known to be consequent upon stress of weather, &c. Including such cases, the grand total for 1914 is 491 steamers of 870,662 tons gross.
